

Scientific and educational development Committee

Scientific and Educational Development Committee

The Foundation's Scientific and Educational Development Committee is appointed by the Governing Board for a four year term. It is made up of at least five scientific figures, from France and abroad, chosen for their contributions to science.

The committee assists the Governing Board by providing its reflections on the major guidelines in scientific education (pedagogy, instilling a taste for the sciences, etc.), all the while maintaining the goal of equal access to education and suggestions for new initiatives.

It provides support to the Foundation's activities in its recommendations in terms of educational and scientific cooperation, partnerships and development.

Members of the Scientific and educational development Committee since 2012

Yves Bréchet : **President of the Committee**, member of the Académie des Sciences, High Commissioner for Atomic Energy, Professor (engineering science), Institut National Polytechnique de Grenoble
